Art Unit: 2833

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Benjamin et al in view of Vermeersch.

Benjamin et al discloses metal switch piece 20 on metal upper housing 12, and switch 100. Vermeersch discloses two metal pieces 31, 33a forming a switch. It would have been obvious to replace switch 100 of Benjamin et al with a metal piece, as taught by Vermeersch, for economy of manufacture. Note that the card is not being positively recited in claim 4.

3. The other references cited on Form 892 are cited to show similar card reader connectors with switches.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Paumen whose telephone number is (703) 308-1414.
